Originator Ref	Design 2.5	
Priority	2	

Section Section 6.

Page NA

Figure Table NA

Category Name Design-CSS

Actionee HAIS

Sub Category OODCE to CORBA

Subject Clarify service relationship to CORBA and COSS

Description of Problem or Suggestion:

The relationship between OODCE services, implemented in early releases, and CORBA 2.0 services, in later releases, is not clear. This makes assessing the transition from OODCE to CORBA difficult.

Originator's Recommendation

For each service that corresponds to OMG CORBA 1.0 and/or OMG Common Object Services Specification (COSS), discuss relationship between proposed service and corresponding OMG standard in the Overview section. In the Implementation section, discuss whether proposed implementation will conform to existing or proposed OMG COSS standards, and if not, how transition is planned to be handled.
